LIGHTING LINE

DESIGN ALUMINIUM PROFILES FOR LED STRIPS

LIGHTING LINE

ABOUT US

Building on years of experience in the lighting industry, Lighting Line specializes in designing and supplying aluminium profiles and LED strips.

The company has steadily grown over the years and, as of 2022, the entire Lighting Line product range is being manufactured in the newly established Chinese factory in Guangdong. The strategic move to start a proprietary production facility enables complete control over the production process, thus ensuring high quality

standards and more affordable prices.

Recent developments also resulted in a new layout for our stock with the installation of a brand new high-performance vertical warehouse in 2022. In addition to speeding up order processing, this state-of-the-art solution enhances the protection of our stock, improves productivity and drastically reduces the chance of human error.

Our wide selection of aluminum profiles proudly boasts an impeccable Italian design and our registered trademark **Orizzonte** has all the credentials to meet a virtually infinite number of requests for custom LED strips.

To date, our extensive catalog, the expertise of our team and the record delivery times of our logistics department combine to make us a competitive player in the industry.

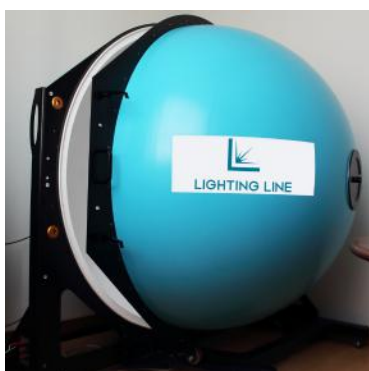

DARK ROOM WITH GONIOPHOTOMETER AND INTEGRATING SPHERE SPECTRORADIOMETER

Innovation and technology play a key role in our company.

Our first investment in high-tech was the installation of a Dark Room with a Goniophotometer in 2018.

Light direction and intensity can be influenced by many aspects, such as LED's characteristics, the distance from the cover and its material, the shape of the profile itself. In order not to neglect these factors and provide reliable results we have carried out tests our aluminum profiles with each cover using 14,4W/m and 9,6W/m strips with 2835 LED chip. We can also perform photometric tests on LED strips provided by customers so as to support them in the choice of the most suitable profile for their lighting projects.

The second device we systematically rely on to test our products is our integrating sphere spectroradiometer, which makes us able to measure the spectral radiance of our strips and thus to draft ad hoc test reports providing information on their efficiency, color temperature, wavelength, light quality (CRI) and many other features.

HOW DO YOU BREAK DOWN LIGHTING LINE CODES?

Profiles (LLP)

LLP	Dash	Type	Progressive n.	Dash	Cover	Dash	Colour	Length
LLP	-	SL	08	-	03	-	S	2
LLP	-	SL	08	-	03	-	B	3

Type	
SL	Surface (Slim Line)
RE	Recessed
AN	Corner
CL	Ceiling
ST	Step
DW	Drywall
TI	Tiles
WL	Wall
BB	Baseboard
CC	Concrete
FL	Floor
NE	Neon
SH	Shelves
WB	Wardrobe
MR	Mirror

Colour	
S	Silver
P	Polished silver
B	Black
BB	Brushed black
W	White

Some profiles are designed to provide different fits of the cover, which can be positioned according to the desired lighting effect. The larger ones can accommodate a slim power supply inside.

Caps, mounting clips and heat sinks are to be provided to complement the profiles.

For more detailed information on the mounting and the accessories required, please see the catalog pages dedicated to the codes of interest.

Covers (LLD)

LLD	Dash	Progressive n.	Dash	Tipologia	Opacity	Length
LLD	-	03	-	F	K	2
LLD	-	03	-	F	M	2
LLD	-	03	-	F	S	3

Type	
F	Flat
U	Round
C	Three-sided
R	Circular
L	L-shaped
W	Waterproof
P	Walkable
X	Lens

Opacity	
K	Transparent
H	Semiopal
M	Opal
S	Frosted
W	Frosted white
B	Black

End caps (LLE)
